Professional Summary

Front-end developer with 1.5 years of experience in building responsive web apps using React, JavaScript, HTML, CSS , Tailwind CSS , skilled in Redux Toolkit, Node.js, and optimizing user interface for performance.

Experience

Software Engineer   *Mumbai, Maharashtra*
Larsen & Toubro   *July 2023 – Present*

- **Shuttle Booking Application :** Developed a car booking web app with real-time availability, and booking options . As the sole Frontend Developer, I built UI with **React and Redux Toolkit for state management, deployed on IIS.**This **reduced booking time by 20%,** boosting user engagement and booking frequency.

- **Gatepass Generation System :** Developed an intuitive web app for generating gate passes, streamlining visitor entry. Led frontend development with React **reducing manual effort by 40%** and **improving operational efficiency** and visitor experience.

- **News Application and Image Analytics Platform :** Contributed to a news app and image analytics platform using HTML, CSS, JavaScript, React, and Canvas API. Focused on building user-friendly interfaces, managing state with **Context API, and handling API integrations** for seamless functionality.

- **PLM Version Upgrade Project :** Contributed to upgrading a legacy PLM system by updating core functionalities using **Java, JSPs, and Java Programming Objects**. Optimized web services and refactored legacy code, improving scalability, maintainability, and reducing downtime.

- **Collaboration :** Worked closely with users and cross-functional teams to gather requirements, incorporate feedback, and ensure the development of solutions that meet user needs and enhance overall satisfaction.
